Where W = overall gross weight on a group of 2 or more consecutive axles to the nearest 500 lbs., L = distance in feet between the extreme of a group of 2 or more consecutive axles, and N = number of axles in the group under consideration except the 2 consecutive sets of tandem axles may carry a gross load of 17,000 lbs. per axle each if the first and last axles of the consecutive sets of tandem axles are not less than 36' apart, and the gross vehicle weight does not exceed 80,000 lbs. including all enforcement tolerances.
